

NOTLA WATER AUTHORITY RATE INCREASE

Notla Water Authority has adopted a water rate increase to be effective on your **JULY** water bill that is paid by August 10th. The increase is needed to insure revenues match the increasing cost to operate the system. The new rates will also insure that there are funds for projects to repair and replace parts of the water system, including water lines and meters; in addition, these funds will be used to maintain monitoring equipment required to operate the water treatment plant. This increase is also needed to cover the rising cost for electricity, increases in material and chemical cost, and other required services since our last rate increase over 4 years ago.

	Current Rates	Adopted New Rates	
Residential	\$19.00	\$21.00	Minimum rate
Commercial	\$38.00	\$42.00	Minimum rate
Booster Pump	\$30.40	\$33.60	Minimum rate
Over 2000 gallons	\$3.70	\$3.95	Cost per 1000 gallons
